# JoinU idea and mission

JoinU

"The idea and mission of the JoinU solution is actually what this product was created for – to give users confidence that when they come to the meeting room at any time, everything will be set up, everything will be under control and the user will instantly start any meeting in one click both offline and online in the desired application for video conferencing. JoinU automatically checks that all device settings are correct and updated.

Also, one of the main requirements for the product is its flexibility for any tasks of different customers and their wishes. The JoinU software solution covers all user needs in the meeting room.

The product was created under the motto - the solution should be stable and easy to use."

## SERVER PART

## SCHEDULER APP

## CONTROLLER APP

## CLIENT APPs

**SERVER PART**

Best in class software for wireless cross-platform parallel screen sharing, video conferencing and meeting room booking system, including:

- ✓ All Videoconference Apps in 1 JoinU App
- ✓ Screen Sharing – from any devices up to 10 at the same time
- ✓ Any Calendar Integration – for Booking meeting room
- ✓ Centralized online control panel

**SCHEDULER APP**

JoinU Room Scheduler is an application for scheduling rooms that lets you view your conference room schedules and display meeting room statuses.

JoinU intuitive interface helps you keep track of pending meetings, agendas, room schedules and availability. With a single click, all employees can book the meeting room of their preference.

**CONTROLLER APP**

To enhance online meetings' efficiency, you can add a meeting room control system tablet to your JoinU. Access your meeting room bookings with just a click and easily connect to conference calls. Unleash the true capabilities of JoinU software using the remote control Zoom and Teams, while taking control of your meeting sessions and managing all meeting room peripherals.

**CLIENT APPs**

JoinU client apps add additional features enable user-friendly collaboration during meetings, both online and offline.

They deliver stable screen mirroring, remote control and management of meetings/presenters, ability to quickly forward web links during meetings and many more (web version also available).

JoinU SERVER PART

JoinU

# JoinU SERVER PART

**JoinU**

The JoinU server part is the main part and the core of the solution. This software is installed on the main device – display in the meeting room – which should be equipped with Intel processor and support Windows OS.
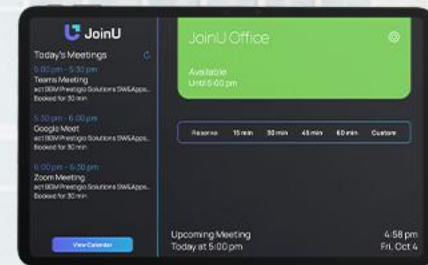

## BENEFITS:

✓ Wireless Screen Sharing from different operating systems and devices, up to 10 devices simultaneously. There are JoinU Client apps available and all native technologies for screen sharing that do not require app installation are also supported.

✓ Already integrated with all popular applications for Video Conferences, such as MS Teams, Zoom, Google Meet, Webex, Slack, Telegram, Chime, Skype, GoToMeeting, Blue Jeans, Lifesize etc.

✓ Allows the user to start a call in a seconds or accept a meeting from any VCS app.

✓ Ready-made quick integration with popular calendar services and open API for integration with custom calendars.

✓ Digital Signage module, for displaying ads or corporate TV on the main screen in the meeting room.

✓ Online admin panel (dashboard), for remote access and the ability to control the main device in the meeting room. The administrator can control and receive notifications about the status of the meeting room in real time and the system will warn if any problem occurs. Via the dashboard, users can also access a built-in app store, analytics for meeting rooms and much more.

✓ Easily customizable solution with flexible settings.

## HOW IT WORKS:

1 license is required for the main meeting room device and you get the JoinU CONTROLLER APP and CLIENT APPs for free.

# JoinU ROOM SCHEDULER APP

**JoinU**

JoinU Room Scheduler app is installed on Android or iPad tablets (iPad support - coming soon), which will be placed at the entrance of meeting rooms to use on the spot for extra convenience.

## BENEFITS:

✓ Instantly shows users whether the meeting room will be free or busy.

✓ Checks the booking schedule for a day or week.

✓ Directly books a meeting room from the application using Quick Booking feature or schedules a future meeting.

✓ Easily customizable. For example, you can set your own wallpaper.

✓ Online admin panel with remote access. The administrator can control and receive notifications about the status of the meeting room in real time and the system will warn if any problem occurs.

## HOW IT WORKS:

This is an independent solution, so you only need 1 license for the tablet at the meeting room entrance. JoinU SERVER PART license is not required, but it can be combined and the systems will be synchronized automatically.

**JoinU**

JoinU Room Controller app is installed in Android or iPad tablets (iPad support - coming soon), which are placed on the meeting room table to keep everything under control, while sitting.
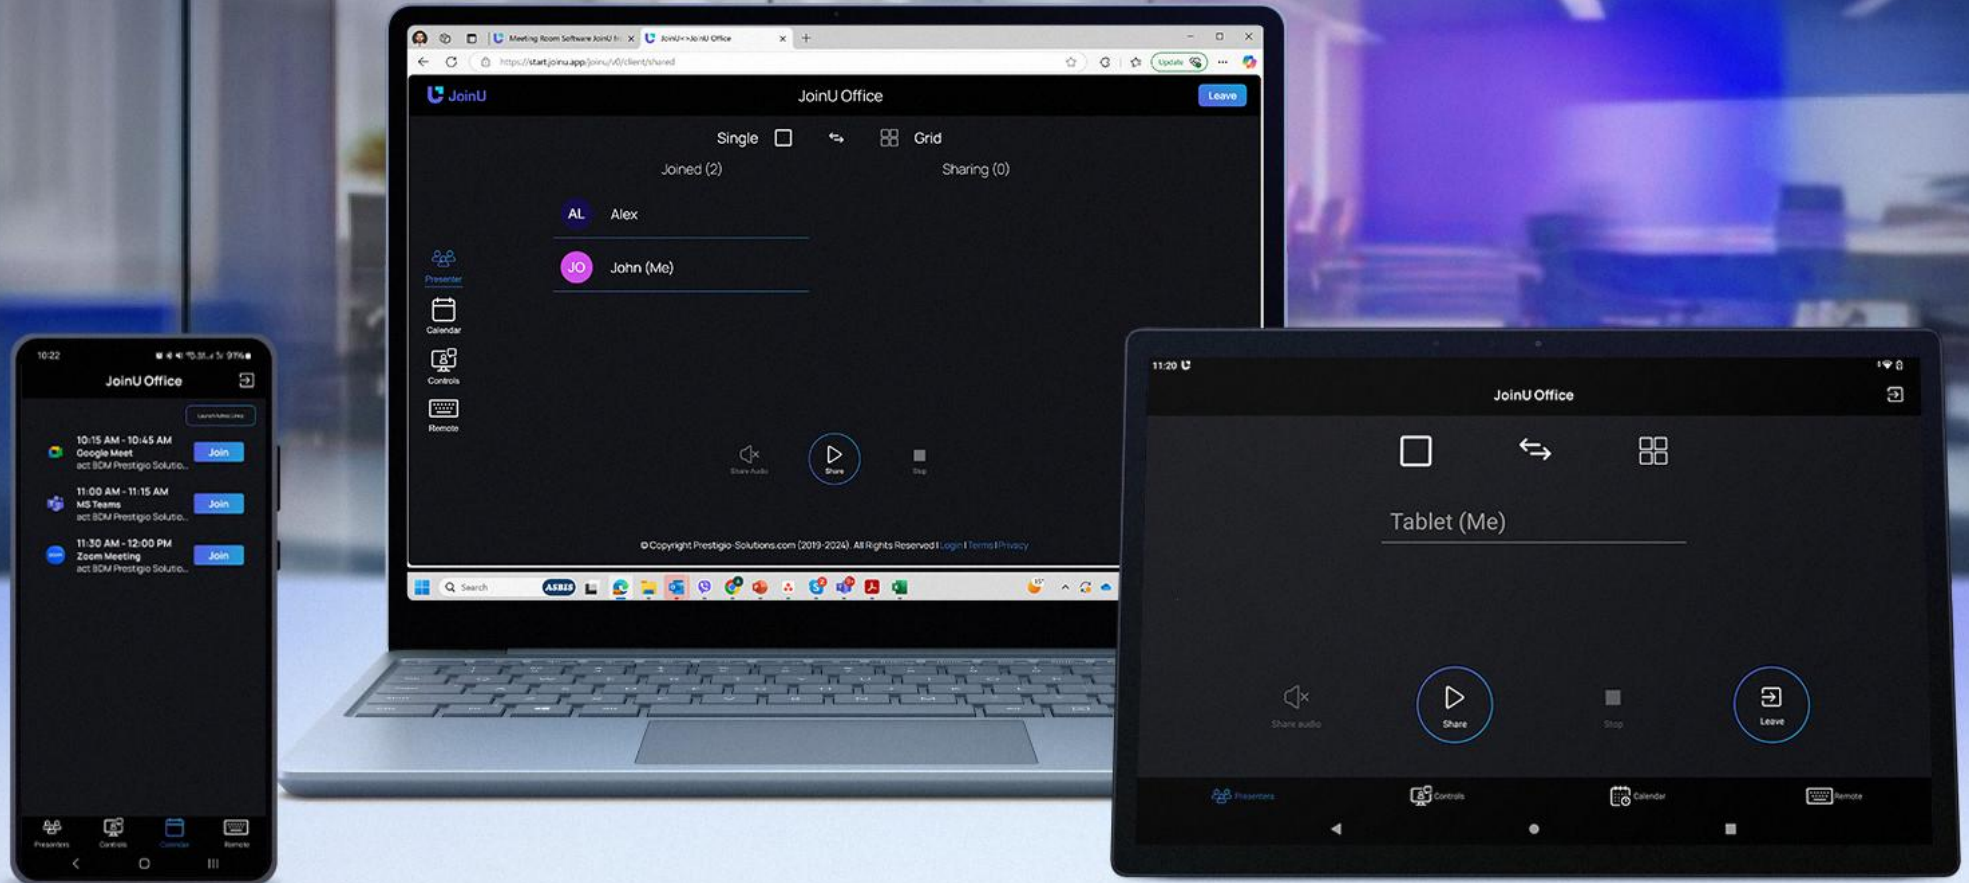

## BENEFITS:

- ✓ Allows users to start scheduled meetings in one click.
- ✓ Make personal calls to colleagues or groups/chats.
- ✓ Manage all meeting room equipment through the tablet, for example cameras (including PTZ), microphones, sound system etc.
- ✓ Use touchpad and keyboard to control the meeting room's main device.
- ✓ Presenter management feature.

## HOW IT WORKS:

JoinU ROOM CONTROLLER APP is provided for free, therefore no license is required. The solution works only in conjunction with the JoinU SERVER Part, so you need to get that first.

# JoinU CLIENT APPs

JoinU CLIENT APPs can be installed on devices with Windows OS, Mac OS, Android and iOS (coming soon). Users can alternatively use the WEB version, where no installation is required. Apps provide additional features and functionalities, so that users can easily perform multiple tasks during meetings.

**BENEFITS:**

✓ Guaranteed stable screen mirroring from the user device to the central device in the meeting room.

✓ Pause screen sharing to safely select the desired content and then continue sharing.

✓ Share only sound to the central device.

✓ Effectively manage presenters.

✓ Fine tune meetings through the remote control.

✓ Launch meetings on the central device in just one click.

✓ Send any web link from your device to the central device/screen and it will be opened instantly for all participants to view

✓ Send meeting link invitations to a meeting to the central device with JoinU server part, where the link will be opened immediately and in the required VCS application and the meeting will start with the connection of all meeting room equipment.

**HOW IT WORKS:**

JoinU CLIENT APPs are provided for free (no license required), but the solution works only in conjunction with the JoinU SERVER PART, so you need to get that first.
